of the
American Association of Engineering Societies, Inc.

ERRATA

The following errors were identified after the main body of this report was sent to the printer:

Engineering technology bachelor's degrees from the University of Houston's College of Technology were omitted from the tables: 20 in Building Energy Systems, 5 in Computer Engineering Technology, 50 in Construction Management, 28 in Design Drafting Technology, 30 in Distributive & Business Education, 39 in Electrical Technology, 86 in Electronics Technology, 98 in Industrial Technology, 34 in Manufacturing Systems Technology, 3 in Survey & Mapping Technology, and 31 in Technical Education. This adds 424 BSET degrees to the totals shown in the tabulations. Graduates from the College of Technology included 87 women, 48 blacks, 33 Hispanics, 29 Asian-Americans, and 27 foreign nationals.

The numbers of degrees reported for bachelor's degrees at the University of Akron's Community and Technical College turned out to be erroniously high. In Construction Technology, the school awarded 23 BSET's, not 108. In Electronics Technology, there were 57 BSET degrees instead of the reported 140 (and one female graduate instead of the reported total of 5 women), and in Mechanical Technology there were 31 BSET's, not 143 (and one female graduate instead of the reported total of 12 women). Also, the number of associate degrees in Surveying & Construction Technology at this school was 17, not the reported total of 93. All other data for this school are correct as shown in the tables. The overall effect of these changes is to reduce the total number of BSET degrees shown in the tabulations by 280, and to reduce the total number of ASET degrees by 76.

The net effect of corrections for both Houston and Akron on total BSET awards is to add 144 degrees to the data in the tables.

In addition, 23 associate and 39 bachelor degrees in Electronics Technology from the University of Hartford were mistakenly classified with Electrical Engineering Technology instead of Electronics Engineering Technology; three master's degrees in Industrial Technology from East Tennessee State University were mistakenly classified with General Engineering Technology programs instead of with Industrial Engineering Technology; and four master of science in engineering degrees in Applied Mathematics from the California Institute of Technology were erroniously classed with Mechanical Engineering instead of with Engineering Science.

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

INTRODUCTION

For twenty years, the Engineering Manpower Commission (EMC) has collected data on enrollment and degrees in engineering. This report provides statistics on degrees awarded in the United States in engineering and engineering technology during the 1985-1986 academic year. Degree production is stated for particular disciplines (such as chemical engineering, civil engineering, electrical engineering, etc.), and for differing academic levels (B.S., M.S., etc.). Detailed information is provided for specific institutions; subtotals for each State are included. The report also identifies the numbers of awards to women, members of minority groups, and foreign students.

In engineering, the study covers 303 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous degree reports from EMC. These listings provide a comprehensive enumeration of engineering programs available in the United States today (a few very new programs are not included as they have yet to produce graduates).

In engineering technology, the 1986 degree survey includes data from 282 schools. This is a substantial increase, compared to previous EMC degree studies. All ABET-approved technology programs are included in the data. The decision to provide 100 percent coverage of all ABET-accredited technology programs is a change from past EMC practices and is intended to improve the stability and comparability of the year-to-year statistics gathered by these studies.

In all, 508 institutions of higher education are covered by the 1986 survey (77 have both engineering and engineering technology programs).

As in the past, EMC's degree report is issued in three volumes (we are considering a new single-volume format, but action on that issue was deferred this year in order to give adequate attention to a large number of other types of changes and refinements in our methods and procedures). The contents of the three volumes are as follows:

Part I--By School summarizes degrees awarded by each institution, in alphabetic order by State. Details for each major type of curriculum are provided, along with subtotals for each State and for the nation. Descriptive data for the schools includes codes for institutional types (public, private, etc.) and accreditation statuses, as well as a special response code that flags any unusual characteristics of the data for the school. Separate tabulations are included for bachelor, master's, professional, and doctorate degrees in engineering, and for certificates, associate, bachelor, and master's degrees in engineering technology. Brief summary tables are provided that summarize overall numbers of degrees, across all schools and states, awarded to women, members of four minority groups (blacks, Hispanics, Asian-Americans, and American Indians), and foreign nationals.

Part II--By Minorities provides the same detailed, school-specific data that is presented in the general *Part I* report for each of the six special population groups listed above: women, the four minority categories, and foreign nationals. For example, this volume allows a reader to identify specific schools in any particular geographic region that have awarded significant numbers of degrees in some particular field of engineering to women (or to black students, or to foreign nationals).

Part III--By Curriculum provides different tabulations of the degree data. Each major discipline is listed, with a line of data for each specific program offering. Often schools have more than one program in a single broad engineering or engineering technology discipline; when this is the case, institutions have multiple listings in the *Part III* report. Distinctions such as separate accredited and unaccredited offerings, or between programs leading to differing degrees (such as the difference between master of science and master of engineering diplomas) are preserved, and the specific titles attached to each degree are displayed. The latter step permits examination of

the data to find graduates with specialized engineering skills not otherwise identified in the more general tabulations of some 20 broad curriculum categories; for example, within the general group of industrial engineering graduates it is possible to locate specific programs in manufacturing engineering. For each program, both school-level descriptive codes and program-level ABET accreditation statuses are displayed. Numbers of degrees are listed separately for each major level (B.S., M.S., etc.), and overall totals are displayed along with aggregate totals for awards to women, minorities and foreigners. After presenting these data, with schools listed alphabetically within states for each of the major disciplinary categories in both engineering and engineering technology, a final tabulation summarizes national degree production for every program title used in the 1986 degree study.

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of degree level and school were checked against original questionnaires. Results across major disciplinary categories for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of degree production were checked and confirmed.

In addition, all institutional-level type and accreditation codes used by EMC were doublechecked, confirming all questionable assignments by using the 20th edition of *The College Blue Book* (New York: Macmillan, 1985). In some cases pending regional accreditation applicants (as listed in the *Blue Book*) were updated to reflect subsequent conferral of full accreditation, by direct checking with the institutions. Type codes were also revised in a number of cases, most frequently for institutions with a current and firm association with religious denominations (which had often been misidentified as secular private schools in earlier EMC reports). Again, direct queries with the schools were used to ensure that an appropriate characterization was used in ambiguous cases.

One type of error correction used in past EMC degree reports has *not* been used in the survey of 1986 degrees: the estimation of missing data. There are two reasons for this shift, each applicable to a particular type of missing data estimate used in the past. In earlier EMC educational surveys, we were usually unable to obtain data for every school of engineering we sought to include in the statistics, so estimates would be made to allow for missing institutions. In the 1986 survey, as in the previous 1985 survey, this problem did not arise (at least not after the use of EMC's traditional practice of allowing substitution of a prior-year response, if available, for any single instance of nonparticipation by a school; see below). The other type of estimation used in previous EMC reports was the development of conservative approximations for missing data on special population groups of interest to the engineering profession: data on degrees to women, minorities, or foreign nationals. In the 1986 degree survey, the incidence of this type of problem has been reduced to a minimum, and so we have elected to eliminate estimates altogether, so that tracking of degrees to these groups is not influenced by estimation errors. At the same time, a set of special response codes has been employed to flag all instances where schools did not provide these details. Accordingly, in reading the tabulations, if (for example) the number of degrees awarded to women is stated as zero and no special response code is present, the reader may assume that EMC judges the zero result to be real; if the number is zero but an "A" (for "All Details Missing") code is present, then the reader should assume that some degrees were probably awarded to women but that EMC does not know precisely how many such degrees there were. In addition to these flags, a table is provided below that lists all cases of missing data.

The effect of this change is to slightly lower our overall statistics on degree awards to women, minorities, and foreign nationals. Despite this, the 1986 totals show increases in awards to minorities at the bachelor's level compared to 1985, even though the 1985 figures did include missing data estimates. In the case of women, the absolute number of B.S. degrees drops slightly, compared to 1985; if missing data estimates had been used in both years we judge that the share of awards to women would have held roughly constant in 1985-86. More detailed comments on trends will be forthcoming in EMC's *Manpower Bulletin* No. 84 on "Engineering Degree Statistics and Trends, 1986"; we will note here, however, that the total number of B.S. degrees in 1986 was just slightly higher than in 1985, as expected.

In a few cases, schools were able to provide firm data on overall degrees to women, minorities, or foreign nationals, but were not able to provide specific assignments of these graduates to particular engineering programs; in those cases, EMC assigned the totals to the programs, using prior degree and enrollment reports and overall distribution of degrees among programs as a guide. These were *not* flagged as estimates, since the total figures used in the process were genuine. EMC has no objection to the use of reasoned estimates by schools themselves in reporting these data, and in the future we will strongly encourage schools to carry out this process for themselves rather than leaving it to EMC. Usually this step was used only when data was collected over the telephone for institutions that had not responded to the degree survey for two or more years.

As noted above, EMC is continuing its traditional practice of allowing the use of a prior year's response as a substitute for a single instance of nonparticipation. These substituted cases are now the only estimates left in the data base. These schools are listed below. They are also clearly flagged in the tables with "S" response codes. Substitutions were allowed for both engineering and engineering technology schools. The entire degree report was delayed somewhat in its processing while procuring and installing new computer systems, and to minimize further delays substitutions were used freely when available, reserving EMC's usual "arm twisting" to obtain missing data on those institutions which had not been heard from for two straight years, and for whom no substitution would be allowed. In future educational surveys, we will contact institutions to avoid substitutions as well--especially schools of special interest such as those that traditionally serve minorities or those that have any very substantial (more than 100) number of graduates.

Other quality control steps were taken. All ABET accreditation codes at the program level were double-checked for this year's degree study, resulting in the correction of some earlier errors (notably the erronious characterization of industrial engineering programs at both Oklahoma State University and the University of Oklahoma as not accredited by ABET; our apologies are in order). Also, a good deal of effort was expended to standardize the program titles listed in the *Part III* volume on details of curricula, eliminating distinctions produced by such nonsubstantive differences as variations in the style of abbreviations or in such choices as the designation of a program as "electronic engineering" versus "electronics engineering." At the same time, care was taken to preserve such distinctions as those between programs leading to the degree of, say, bachelor of chemical engineering, and other programs leading to the degree of bachelor of engineering with a reported chemical option or major field specialization. Such distinctions can reflect significant differences in philosophies of engineering education. (It should be noted, though, that such distinctions can also arise for reasons that have more to do with general institutional policies than with any particular approach to the education of engineers; furthermore, it is not clear that all of the schools that make these kinds of distinctions also report them to EMC.)

All this error checking for the survey of 1986 degrees has special significance for EMC, for this report is the initial application of the Commission's new computing systems, which are being used to create a permanent data base on engineering programs that will be used to support all our educational surveys. Despite all of the effort to eliminate mistakes, it is not likely that we will have succeeded in rooting out all of the problems in a single round of work. We will be continuing the work of developing and refining this data base and we urge all readers to contact us directly as any remaining errors are uncovered.

In the coming months, we will also be turning to a different aspect of these studies: the question of the best and most up-to-date taxonomy for the classification and labeling of engineering programs. We would like to hear from readers with suggestions about such matters, and we will be especially interested in identifying any students of engineering education who have experience with this subject.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies (see the inside back cover for addresses and telephone numbers). The three volumes of *Engineering and Technology Degrees: 1986* are available separately or as a set. For ordering information and prices, see the inside back cover.

SUBSTITUTED DATA

No 1986 degree report was obtained by EMC for the following schools. However, 1985 reports were available, and were substituted for the missing data. When these schools appear in tabulations, they are flagged with a special response code "S." In some cases substitutions were needed for only portions of a school's data (for example, information on B.S. awards in 1986 may have been submitted, but data on graduate degrees may have been left out, leading to substitution of the graduate degrees only). In such cases, the flags appear only when needed.

Engineering Schools:

Arkansas Tech University
California Polytechnic--San Luis Obispo
CCNY (City College of New York; graduate programs only)
Cleveland State University
Cooper Union
Fairleigh Dickinson University
Geneva College
Grove City College
Hartford Graduate Center (graduate degrees only)
Humboldt State University
Idaho State University
Indiana Institute of Technology
Merrimack College
Montana State University
New Mexico Institute of Mining and Technology
New Mexico State University
Northrop University
Oakland University
Parks College, St. Louis University
Philadelphia College of Textiles
Princeton University
Purdue University--Calumet Campus
San Francisco State University
South Dakota State University
SUNY--Buffalo Campus
SUNY: Maritime College
Tennessee State University
Tufts University
University of Bridgeport
University of Dayton (graduate programs only)
University of Georgia
University of Nebraska--Lincoln
University of New Orleans
University of Puerto Rico
University of South Carolina
University of Texas--Permian Basin
Valpariso University
Western Michigan University

Engineering Technology Schools:

Alabama A&M University
Blue Mountain Community College
Bronx Community College
Catawba Valley Technical College
Cleveland State University
Cogswell College
Corning Community College
Florida A&M University
Georgia Southern College
Glendale Community College
Hawkeye Institute of Technology
Hudson Valley Community College
Institute of Paper Chemistry
Jefferson College
Kellogg Community College
Mesa College
Middlesex County College
Milwaukee Area Technical College
Mohawk Community College
Monroe Community College
Nassau Community College
New York City Technical College
Northeast Oklahoma A&M Junior College
Northrop University
OSU Technical Institute
Phoenix College
Prince George's Community College
Purdue University--Calumet Campus
Rock Valley College
Roger Williams College
Sandhills Community College
Sinclair Community College
Trenton State College
Tri-County Technical College
Union College
University of Georgia
Western Kentucky University

MISSING DATA

NOTE: this listing is *not* comparable to similar lists in previous EMC degree reports. Those listings identified schools which had not been included in the survey data at all. There are *no* such schools in the survey for 1986. The listing below is, instead, an inventory of institutions with missing *details* on one or more special population groups: women, minorities, or foreign nationals. As noted in the text, in 1986 EMC has *not* made any estimates to fill in these missing details:

Engineering Schools:

California Institute of Technology (no details)
California State--Fresno (no minority/foreign)
California State--Sacramento (no details)
Cornell University (no foreign at grad level)
Drexel Institute of Technology (no foreign)
Florida Atlantic University (no details)
Grove City College (no details)
Miami University (no minority/foreign)
New Jersey Inst. of Tech. (no minority/foreign)
New York Inst. of Tech. (no minority/foreign)
Oregon State University (no details)
South Dakota State University (no details)
St. Mary's University (no details)
SUNY--Binghampton Campus (no details)
University of California--Berkeley (no data on minorities/foreign for chemical engineering)
University of California--Davis (no details for graduate programs; undergraduate okay)
University of Dayton (no details)
University of Nevada--Reno (no details)
University of Nevada--School of Mines (no details)
University of New Haven (no details)
University of New Orleans (no details)
University of Tennessee--Knoxville (no foreign)
University of Washington (no foreign)
University of Wisconsin--Platteville (no details)
U.S. Military Academy (no details)
U.S. Navy Postgraduate School (no details)
Washington State University (no minority/foreign)

Engineering Technology Schools:

Central Maine Vocational Tech (no details)
City College of San Francisco (no details)
College of Staten Island (no minority/foreign)
DeVry Institutes: ALL LOCATIONS (no details)
Erie Community College (no details)
Houston Community College (no details)
Montgomery College (no details)
SUNY College of Technology (no minority/foreign)
Technical Career Institute (no details)
Tri-City State Tech (no details)
University of Dayton (no details)
University of Hartford (no details)
University of Houston--Downtown (no details)

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

In place of a numerical coding scheme previously used by EMC, the 1986 survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School: "S" means state or other public control, including municipally-sponsored schools, excluding federally-sponsored service academies (which are designated with an "F"). "N" means non-sectarian, non-profit private institutions. "R" denotes religiously affiliated private institutions. "P" denotes proprietary schools.

A: Accreditation: "E" means at least one *engineering* program is accredited by ABET. "T" means that at least one *technology* program is accredited by ABET. "B" means that the school has ABET-approved courses in *both* engineering and technology. "R" means the school does not have ABET-accredited courses but is approved at the institutional level by a recognized regional accreditation agency, such as the Southern Association of Colleges and Schools. "X" means none of the preceeding codes apply (in most cases, schools with this code are approved candidates for regional certification). An "N" code (accreditation by NATTS, the National Association of Trade and Technical Schools) was allowed but not used.

R: Response: These codes appear only when applicable. "S" denotes substituted data; in a few cases such schools also have missing details (see the listings above to identify these). "X" is a special code standing for "extra data" and used only in the case of the University of Texas at Austin (see "Miscellaneous Notes," below). All other special response codes denote one or another type of missing data for details on special population groups. "A" means that all such data were missing. "Y" denotes cases where all details were missing *except* data on women. "F" means that data on foreign nationals was missing. "Z" is a special code used only for the University of California at Berkeley, which supplies all details except data on degrees in chemical engineering to minorities and foreign nationals. Other special codes--for example, an "M" code for missing data on minorities only--were allowed but not used. Note that the response codes are program-specific: they may appear in one listing for a school but not appear in another, if one program involved substitutions or missing details but the other did not.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RRS: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1985 response. "TAR" code of NEY: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the *Part III* volume on curriculum details: "B" denotes ABET accreditation for the program at the bachelor's level; "M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent); "A" denotes ABET accreditation at the associate degree level; "N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when a ABET-approved BS curriculum in mechanical engineering was present. If an undergraduate program in engineering mechanics as such existed, then the "B" code was used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

DISCIPLINE CATEGORY ABBREVIATIONS:

Engineering Degrees:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others

Engineering Technology Degrees:

AER = Aeronautical
ACN = Air Conditioning/Heating/Refrigeration
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil/Highway/Surveying
CMP = Computer
CON = Construction
DRF = Drafting/Design
ELC = Electrical
ELM = Electromechanical
ELX = Electronic
ENS = Engineering Science
GNL = General Engineering
INM = Industrial/Manufacturing
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgical/Welding
NUC = Nuclear
OTH = Other (including Agric/Bio/Envir/Petrol)
PRE = Pre-Engineering

MISCELLANEOUS NOTES

All "3-2" programs or other pre-engineering curricula are treated as technology courses.

The following institutional name changes are reflected in the 1986 survey: University of Santa Clara to Santa Clara University; Southern Technical Institute to Southern College of Technology; Northeastern Oklahoma State University to Northeastern State University.

The new engineering program at Alfred University is listed separately from the degrees of the SUNY College of Ceramics at Alfred University. Other newly listed engineering schools include the University of Southern Colorado, FAMU/FSU, Loras College, St. Ambrose College, St. Cloud State University, the University of Texas at San Antonio, George Mason University, and Cogswell College North.

Because EMC is now allowing somewhat later responses than in earlier years, the University of Texas at Austin shifted to a September-through-September reporting schedule. To report total degree production, the school supplied data for an extra fifth quarter, which was included. This case is flagged with the special response code "X" (for extra data).

In EMC's 1985 degree report, undergraduate and graduate listings for the University of Alaska at Anchorage were reversed. Also, Auburn University was erroniously listed as missing from the data for ABET-accredited technology programs, but in fact these degrees had been erroniously listed as engineering B.S. awards. In addition, there were the two errors in identification of the ABET accreditation statuses of industrial engineering programs at Oklahoma State University and the University of Oklahoma, as noted in the text, above; both programs are in fact approved by ABET.

RECENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1986

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $135.00 non-member price: $225.00

PROFESSIONAL INCOME OF ENGINEERS 1986

An abridged version of the *Special Industry Report.* Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $45.00 non-member price: $75.00

SALARIES OF ENGINEERS IN EDUCATION 1986

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $50.00 non-member price: $80.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1985

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $105.00 non-member price $175.00

Separate volumes:

Part I: Engineering Enrollments: member price: $60.00 non-member price: $100.00

Part II: Technology Enrollments: member price: $60.00 non-member price: $100.00

ENGINEERING AND TECHNOLOGY DEGREES, 1986

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $120 non-member price: $200.00

Separate volumes:

Part I: by School: member price: $45.00 non-member price: $75.00

Part II: Minorities: member price: $60.00 non-member price: $100.00

Part III: by Curriculum: member price: $45.00 non-member price: $75.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year (minimum five issues, July through June) member price: $45.00 non-member price: $75.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Add $1.00 per book for book rate postage; add 5% of total amount for first class postage. Foreign orders add 10%. No handling charges for *Bulletin* orders. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

ERRATA

The following errors were identified after the main body of this report was sent to the printer:

Engineering technology bachelor's degrees from the University of Houston's College of Technology were omitted from the tables: 20 in Building Energy Systems, 5 in Computer Engineering Technology, 50 in Construction Management, 28 in Design Drafting Technology, 30 in Distributive & Business Education, 39 in Electrical Technology, 86 in Electronics Technology, 98 in Industrial Technology, 34 in Manufacturing Systems Technology, 3 in Survey & Mapping Technology, and 31 in Technical Education. This adds 424 BSET degrees to the totals shown in the tabulations. Graduates from the College of Technology included 87 women, 48 blacks, 33 Hispanics, 29 Asian-Americans, and 27 foreign nationals.

The numbers of degrees reported for bachelor's degrees at the University of Akron's Community and Technical College turned out to be erroniously high. In Construction Technology, the school awarded 23 BSET's, not 108. In Electronics Technology, there were 57 BSET degrees instead of the reported 140 (and one female graduate instead of the reported total of 5 women), and in Mechanical Technology there were 31 BSET's, not 143 (and one female graduate instead of the reported total of 12 women). Also, the number of associate degrees in Surveying & Construction Technology at this school was 17, not the reported total of 93. All other data for this school are correct as shown in the tables. The overall effect of these changes is to reduce the total number of BSET degrees shown in the tabulations by 280, and to reduce the total number of ASET degrees by 76.

The net effect of corrections for both Houston and Akron on total BSET awards is to add 144 degrees to the data in the tables.

In addition, 23 associate and 39 bachelor degrees in Electronics Technology from the University of Hartford were mistakenly classified with Electrical Engineering Technology instead of Electronics Engineering Technology; three master's degrees in Industrial Technology from East Tennessee State University were mistakenly classified with General Engineering Technology programs instead of with Industrial Engineering Technology; and four master of science in engineering degrees in Applied Mathematics from the California Institute of Technology were erroniously classed with Mechanical Engineering instead of with Engineering Science.

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

INTRODUCTION

For twenty years, the Engineering Manpower Commission (EMC) has collected data on enrollment and degrees in engineering. This report provides statistics on degrees awarded in the United States in engineering and engineering technology during the 1985-1986 academic year. Degree production is stated for particular disciplines (such as chemical engineering, civil engineering, electrical engineering, etc.), and for differing academic levels (B.S., M.S., etc.). Detailed information is provided for specific institutions; subtotals for each State are included. The report also identifies the numbers of awards to women, members of minority groups, and foreign students.

In engineering, the study covers 303 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous degree reports from EMC. These listings provide a comprehensive enumeration of engineering programs available in the United States today (a few very new programs are not included as they have yet to produce graduates).

In engineering technology, the 1986 degree survey includes data from 282 schools. This is a substantial increase, compared to previous EMC degree studies. All ABET-approved technology programs are included in the data. The decision to provide 100 percent coverage of all ABET-accredited technology programs is a change from past EMC practices and is intended to improve the stability and comparability of the year-to-year statistics gathered by these studies.

In all, 508 institutions of higher education are covered by the 1986 survey (77 have both engineering and engineering technology programs).

As in the past, EMC's degree report is issued in three volumes (we are considering a new single-volume format, but action on that issue was deferred this year in order to give adequate attention to a large number of other types of changes and refinements in our methods and procedures). The contents of the three volumes are as follows:

Part I--By School summarizes degrees awarded by each institution, in alphabetic order by State. Details for each major type of curriculum are provided, along with subtotals for each State and for the nation. Descriptive data for the schools includes codes for institutional types (public, private, etc.) and accreditation statuses, as well as a special response code that flags any unusual characteristics of the data for the school. Separate tabulations are included for bachelor, master's, professional, and doctorate degrees in engineering, and for certificates, associate, bachelor, and master's degrees in engineering technology. Brief summary tables are provided that summarize overall numbers of degrees, across all schools and states, awarded to women, members of four minority groups (blacks, Hispanics, Asian-Americans, and American Indians), and foreign nationals.

Part II--By Minorities provides the same detailed, school-specific data that is presented in the general *Part I* report for each of the six special population groups listed above: women, the four minority categories, and foreign nationals. For example, this volume allows a reader to identify specific schools in any particular geographic region that have awarded significant numbers of degrees in some particular field of engineering to women (or to black students, or to foreign nationals).

Part III--By Curriculum provides different tabulations of the degree data. Each major discipline is listed, with a line of data for each specific program offering. Often schools have more than one program in a single broad engineering or engineering technology discipline; when this is the case, institutions have multiple listings in the *Part III* report. Distinctions such as separate accredited and unaccredited offerings, or between programs leading to differing degrees (such as the difference between master of science and master of engineering diplomas) are preserved, and the specific titles attached to each degree are displayed. The latter step permits examination of

the data to find graduates with specialized engineering skills not otherwise identified in the more general tabulations of some 20 broad curriculum categories; for example, within the general group of industrial engineering graduates it is possible to locate specific programs in manufacturing engineering. For each program, both school-level descriptive codes and program-level ABET accreditation statuses are displayed. Numbers of degrees are listed separately for each major level (B.S., M.S., etc.), and overall totals are displayed along with aggregate totals for awards to women, minorities and foreigners. After presenting these data, with schools listed alphabetically within states for each of the major disciplinary categories in both engineering and engineering technology, a final tabulation summarizes national degree production for every program title used in the 1986 degree study.

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of degree level and school were checked against original questionnaires. Results across major disciplinary categories for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of degree production were checked and confirmed.

In addition, all institutional-level type and accreditation codes used by EMC were doublechecked, confirming all questionable assignments by using the 20th edition of *The College Blue Book* (New York: Macmillan, 1985). In some cases pending regional accreditation applicants (as listed in the *Blue Book*) were updated to reflect subsequent conferral of full accreditation, by direct checking with the institutions. Type codes were also revised in a number of cases, most frequently for institutions with a current and firm association with religious denominations (which had often been misidentified as secular private schools in earlier EMC reports). Again, direct queries with the schools were used to ensure that an appropriate characterization was used in ambiguous cases.

One type of error correction used in past EMC degree reports has *not* been used in the survey of 1986 degrees: the estimation of missing data. There are two reasons for this shift, each applicable to a particular type of missing data estimate used in the past. In earlier EMC educational surveys, we were usually unable to obtain data for every school of engineering we sought to include in the statistics, so estimates would be made to allow for missing institutions. In the 1986 survey, as in the previous 1985 survey, this problem did not arise (at least not after the use of EMC's traditional practice of allowing substitution of a prior-year response, if available, for any single instance of nonparticipation by a school; see below). The other type of estimation used in previous EMC reports was the development of conservative approximations for missing data on special population groups of interest to the engineering profession: data on degrees to women, minorities, or foreign nationals. In the 1986 degree survey, the incidence of this type of problem has been reduced to a minimum, and so we have elected to eliminate estimates altogether, so that tracking of degrees to these groups is not influenced by estimation errors. At the same time, a set of special response codes has been employed to flag all instances where schools did not provide these details. Accordingly, in reading the tabulations, if (for example) the number of degrees awarded to women is stated as zero and no special response code is present, the reader may assume that EMC judges the zero result to be real; if the number is zero but an "A" (for "All Details Missing") code is present, then the reader should assume that some degrees were probably awarded to women but that EMC does not know precisely how many such degrees there were. In addition to these flags, a table is provided below that lists all cases of missing data.

The effect of this change is to slightly lower our overall statistics on degree awards to women, minorities, and foreign nationals. Despite this, the 1986 totals show increases in awards to minorities at the bachelor's level compared to 1985, even though the 1985 figures did include missing data estimates. In the case of women, the absolute number of B.S. degrees drops slightly, compared to 1985; if missing data estimates had been used in both years we judge that the share of awards to women would have held roughly constant in 1985-86. More detailed comments on trends will be forthcoming in EMC's *Manpower Bulletin* No. 84 on "Engineering Degree Statistics and Trends, 1986"; we will note here, however, that the total number of B.S. degrees in 1986 was just slightly higher than in 1985, as expected.

In a few cases, schools were able to provide firm data on overall degrees to women, minorities, or foreign nationals, but were not able to provide specific assignments of these graduates to particular engineering programs; in those cases, EMC assigned the totals to the programs, using prior degree and enrollment reports and overall distribution of degrees among programs as a guide. These were *not* flagged as estimates, since the total figures used in the process were genuine. EMC has no objection to the use of reasoned estimates by schools themselves in reporting these data, and in the future we will strongly encourage schools to carry out this process for themselves rather than leaving it to EMC. Usually this step was used only when data was collected over the telephone for institutions that had not responded to the degree survey for two or more years.

As noted above, EMC is continuing its traditional practice of allowing the use of a prior year's response as a substitute for a single instance of nonparticipation. These substituted cases are now the only estimates left in the data base. These schools are listed below. They are also clearly flagged in the tables with "S" response codes. Substitutions were allowed for both engineering and engineering technology schools. The entire degree report was delayed somewhat in its processing while procuring and installing new computer systems, and to minimize further delays substitutions were used freely when available, reserving EMC's usual "arm twisting" to obtain missing data on those institutions which had not been heard from for two straight years, and for whom no substitution would be allowed. In future educational surveys, we will contact institutions to avoid substitutions as well--especially schools of special interest such as those that traditionally serve minorities or those that have any very substantial (more than 100) number of graduates.

Other quality control steps were taken. All ABET accreditation codes at the program level were double-checked for this year's degree study, resulting in the correction of some earlier errors (notably the erronious characterization of industrial engineering programs at both Oklahoma State University and the University of Oklahoma as not accredited by ABET; our apologies are in order). Also, a good deal of effort was expended to standardize the program titles listed in the *Part III* volume on details of curricula, eliminating distinctions produced by such nonsubstantive differences as variations in the style of abbreviations or in such choices as the designation of a program as "electronic engineering" versus "electronics engineering." At the same time, care was taken to preserve such distinctions as those between programs leading to the degree of, say, bachelor of chemical engineering, and other programs leading to the degree of bachelor of engineering with a reported chemical option or major field specialization. Such distinctions can reflect significant differences in philosophies of engineering education. (It should be noted, though, that such distinctions can also arise for reasons that have more to do with general institutional policies than with any particular approach to the education of engineers; furthermore, it is not clear that all of the schools that make these kinds of distinctions also report them to EMC.)

All this error checking for the survey of 1986 degrees has special significance for EMC, for this report is the initial application of the Commission's new computing systems, which are being used to create a permanent data base on engineering programs that will be used to support all our educational surveys. Despite all of the effort to eliminate mistakes, it is not likely that we will have succeeded in rooting out all of the problems in a single round of work. We will be continuing the work of developing and refining this data base and we urge all readers to contact us directly as any remaining errors are uncovered.

In the coming months, we will also be turning to a different aspect of these studies: the question of the best and most up-to-date taxonomy for the classification and labeling of engineering programs. We would like to hear from readers with suggestions about such matters, and we will be especially interested in identifying any students of engineering education who have experience with this subject.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies (see the inside back cover for addresses and telephone numbers). The three volumes of *Engineering and Technology Degrees: 1986* are available separately or as a set. For ordering information and prices, see the inside back cover.

SUBSTITUTED DATA

No 1986 degree report was obtained by EMC for the following schools. However, 1985 reports were available, and were substituted for the missing data. When these schools appear in tabulations, they are flagged with a special response code "S." In some cases substitutions were needed for only portions of a school's data (for example, information on B.S. awards in 1986 may have been submitted, but data on graduate degrees may have been left out, leading to substitution of the graduate degrees only). In such cases, the flags appear only when needed.

Engineering Schools:

Arkansas Tech University

Western Kentucky University

MISSING DATA

NOTE: this listing is *not* comparable to similar lists in previous EMC degree reports. Those listings identified schools which had not been included in the survey data at all. There are *no* such schools in the survey for 1986. The listing below is, instead, an inventory of institutions with missing *details* on one or more special population groups: women, minorities, or foreign nationals. As noted in the text, in 1986 EMC has *not* made any estimates to fill in these missing details:

Engineering Schools:

California Institute of Technology (no details)
California State--Fresno (no minority/foreign)
California State--Sacramento (no details)
Cornell University (no foreign at grad level)
Drexel Institute of Technology (no foreign)
Florida Atlantic University (no details)
Grove City College (no details)
Miami University (no minority/foreign)
New Jersey Inst. of Tech. (no minority/foreign)
New York Inst. of Tech. (no minority/foreign)
Oregon State University (no details)
South Dakota State University (no details)
St. Mary's University (no details)
SUNY--Binghampton Campus (no details)
University of California--Berkeley (no data on minorities/foreign for chemical engineering)
University of California--Davis (no details for graduate programs; undergraduate okay)
University of Dayton (no details)
University of Nevada--Reno (no details)
University of Nevada--School of Mines (no details)
University of New Haven (no details)
University of New Orleans (no details)
University of Tennessee--Knoxville (no foreign)
University of Washington (no foreign)
University of Wisconsin--Platteville (no details)
U.S. Military Academy (no details)
U.S. Navy Postgraduate School (no details)
Washington State University (no minority/foreign)

Engineering Technology Schools:

Central Maine Vocational Tech (no details)
City College of San Francisco (no details)
College of Staten Island (no minority/foreign)
DeVry Institutes: ALL LOCATIONS (no details)
Erie Community College (no details)
Houston Community College (no details)
Montgomery College (no details)
SUNY College of Technology (no minority/foreign)
Technical Career Institute (no details)
Tri-City State Tech (no details)
University of Dayton (no details)
University of Hartford (no details)
University of Houston--Downtown (no details)

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

In place of a numerical coding scheme previously used by EMC, the 1986 survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School: "S" means state or other public control, including municipally-sponsored schools, excluding federally-sponsored service academies (which are designated with an "F"). "N" means non-sectarian, non-profit private institutions. "R" denotes religiously affiliated private institutions. "P" denotes proprietary schools.

A: Accreditation: "E" means at least one *engineering* program is accredited by ABET. "T" means that at least one *technology* program is accredited by ABET. "B" means that the school has ABET-approved courses in *both* engineering and technology. "R" means the school does not have ABET-accredited courses but is approved at the institutional level by a recognized regional accreditation agency, such as the Southern Association of Colleges and Schools. "X" means none of the preceeding codes apply (in most cases, schools with this code are approved candidates for regional certification). An "N" code (accreditation by NATTS, the National Association of Trade and Technical Schools) was allowed but not used.

R: Response: These codes appear only when applicable. "S" denotes substituted data; in a few cases such schools also have missing details (see the listings above to identify these). "X" is a special code standing for "extra data" and used only in the case of the University of Texas at Austin (see "Miscellaneous Notes," below). All other special response codes denote one or another type of missing data for details on special population groups. "A" means that all such data were missing. "Y" denotes cases where all details were missing *except* data on women. "F" means that data on foreign nationals was missing. "Z" is a special code used only for the University of California at Berkeley, which supplies all details except data on degrees in chemical engineering to minorities and foreign nationals. Other special codes--for example, an "M" code for missing data on minorities only--were allowed but not used. Note that the response codes are program-specific: they may appear in one listing for a school but not appear in another, if one program involved substitutions or missing details but the other did not.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RRS: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1985 response. "TAR" code of NEY: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the *Part III* volume on curriculum details: "B" denotes ABET accreditation for the program at the bachelor's level; "M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent); "A" denotes ABET accreditation at the associate degree level; "N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when a ABET-approved BS curriculum in mechanical engineering was present. If an undergraduate program in engineering mechanics as such existed, then the "B" code was used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

DISCIPLINE CATEGORY ABBREVIATIONS:

Engineering Degrees:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others

Engineering Technology Degrees:

AER = Aeronautical
ACN = Air Conditioning/Heating/Refrigeration
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil/Highway/Surveying
CMP = Computer
CON = Construction
DRF = Drafting/Design
ELC = Electrical
ELM = Electromechanical
ELX = Electronic
ENS = Engineering Science
GNL = General Engineering
INM = Industrial/Manufacturing
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgical/Welding
NUC = Nuclear
OTH = Other (including Agric/Bio/Envir/Petrol)
PRE = Pre-Engineering

MISCELLANEOUS NOTES

All "3-2" programs or other pre-engineering curricula are treated as technology courses.

The following institutional name changes are reflected in the 1986 survey: University of Santa Clara to Santa Clara University; Southern Technical Institute to Southern College of Technology; Northeastern Oklahoma State University to Northeastern State University.

The new engineering program at Alfred University is listed separately from the degrees of the SUNY College of Ceramics at Alfred University. Other newly listed engineering schools include the University of Southern Colorado, FAMU/FSU, Loras College, St. Ambrose College, St. Cloud State University, the University of Texas at San Antonio, George Mason University, and Cogswell College North.

Because EMC is now allowing somewhat later responses than in earlier years, the University of Texas at Austin shifted to a September-through-September reporting schedule. To report total degree production, the school supplied data for an extra fifth quarter, which was included. This case is flagged with the special response code "X" (for extra data).

In EMC's 1985 degree report, undergraduate and graduate listings for the University of Alaska at Anchorage were reversed. Also, Auburn University was erroniously listed as missing from the data for ABET-accredited technology programs, but in fact these degrees had been erroniously listed as engineering B.S. awards. In addition, there were the two errors in identification of the ABET accreditation statuses of industrial engineering programs at Oklahoma State University and the University of Oklahoma, as noted in the text, above; both programs are in fact approved by ABET.

RECENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1986

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $135.00 non-member price: $225.00

PROFESSIONAL INCOME OF ENGINEERS 1986

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $45.00 non-member price: $75.00

SALARIES OF ENGINEERS IN EDUCATION 1986

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $50.00 non-member price: $80.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1985

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $105.00 non-member price $175.00

Separate volumes:

Part I: Engineering Enrollments: member price: $60.00 non-member price: $100.00

Part II: Technology Enrollments: member price: $60.00 non-member price: $100.00

ENGINEERING AND TECHNOLOGY DEGREES, 1986

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $120 non-member price: $200.00

Separate volumes:

Part I: by School: member price: $45.00 non-member price: $75.00

Part II: Minorities: member price: $60.00 non-member price: $100.00

Part III: by Curriculum: member price: $45.00 non-member price: $75.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year (minimum five issues, July through June) member price: $45.00 non-member price: $75.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Add $1.00 per book for book rate postage; add 5% of total amount for first class postage. Foreign orders add 10%. No handling charges for *Bulletin* orders. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

ERRATA

The following errors were identified after the main body of this report was sent to the printer:

Engineering technology bachelor's degrees from the University of Houston's College of Technology were omitted from the tables: 20 in Building Energy Systems, 5 in Computer Engineering Technology, 50 in Construction Management, 28 in Design Drafting Technology, 30 in Distributive & Business Education, 39 in Electrical Technology, 86 in Electronics Technology, 98 in Industrial Technology, 34 in Manufacturing Systems Technology, 3 in Survey & Mapping Technology, and 31 in Technical Education. This adds 424 BSET degrees to the totals shown in the tabulations. Graduates from the College of Technology included 87 women, 48 blacks, 33 Hispanics, 29 Asian-Americans, and 27 foreign nationals.

The numbers of degrees reported for bachelor's degrees at the University of Akron's Community and Technical College turned out to be erroniously high. In Construction Technology, the school awarded 23 BSET's, not 108. In Electronics Technology, there were 57 BSET degrees instead of the reported 140 (and one female graduate instead of the reported total of 5 women), and in Mechanical Technology there were 31 BSET's, not 143 (and one female graduate instead of the reported total of 12 women). Also, the number of associate degrees in Surveying & Construction Technology at this school was 17, not the reported total of 93. All other data for this school are correct as shown in the tables. The overall effect of these changes is to reduce the total number of BSET degrees shown in the tabulations by 280, and to reduce the total number of ASET degrees by 76.

The net effect of corrections for both Houston and Akron on total BSET awards is to add 144 degrees to the data in the tables.

In addition, 23 associate and 39 bachelor degrees in Electronics Technology from the University of Hartford were mistakenly classified with Electrical Engineering Technology instead of Electronics Engineering Technology; three master's degrees in Industrial Technology from East Tennessee State University were mistakenly classified with General Engineering Technology programs instead of with Industrial Engineering Technology; and four master of science in engineering degrees in Applied Mathematics from the California Institute of Technology were erroniously classed with Mechanical Engineering instead of with Engineering Science.

ABOUT AAES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms*.

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

THE ENGINEERING MANPOWER COMMISSION

The AAES Engineering Manpower Commission, through ongoing surveys of industry and academia, monitors trends and assesses supply for engineering manpower, and produces annual reports on engineering enrollments, degrees, and salaries.

ACKNOWLEDGEMENTS

The Engineering Manpower Commission is grateful for the cooperation of the hundreds of deans and other college officials who provided the data on which this report is based.

INTRODUCTION

For twenty years, the Engineering Manpower Commission (EMC) has collected data on enrollment and degrees in engineering. This report provides statistics on degrees awarded in the United States in engineering and engineering technology during the 1985-1986 academic year. Degree production is stated for particular disciplines (such as chemical engineering, civil engineering, electrical engineering, etc.), and for differing academic levels (B.S., M.S., etc.). Detailed information is provided for specific institutions; subtotals for each State are included. The report also identifies the numbers of awards to women, members of minority groups, and foreign students.

In engineering, the study covers 303 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous degree reports from EMC. These listings provide a comprehensive enumeration of engineering programs available in the United States today (a few very new programs are not included as they have yet to produce graduates).

In engineering technology, the 1986 degree survey includes data from 282 schools. This is a substantial increase, compared to previous EMC degree studies. All ABET-approved technology programs are included in the data. The decision to provide 100 percent coverage of all ABET-accredited technology programs is a change from past EMC practices and is intended to improve the stability and comparability of the year-to-year statistics gathered by these studies.

In all, 508 institutions of higher education are covered by the 1986 survey (77 have both engineering and engineering technology programs).

As in the past, EMC's degree report is issued in three volumes (we are considering a new single-volume format, but action on that issue was deferred this year in order to give adequate attention to a large number of other types of changes and refinements in our methods and procedures). The contents of the three volumes are as follows:

Part I--By School summarizes degrees awarded by each institution, in alphabetic order by State. Details for each major type of curriculum are provided, along with subtotals for each State and for the nation. Descriptive data for the schools includes codes for institutional types (public, private, etc.) and accreditation statuses, as well as a special response code that flags any unusual characteristics of the data for the school. Separate tabulations are included for bachelor, master's, professional, and doctorate degrees in engineering, and for certificates, associate, bachelor, and master's degrees in engineering technology. Brief summary tables are provided that summarize overall numbers of degrees, across all schools and states, awarded to women, members of four minority groups (blacks, Hispanics, Asian-Americans, and American Indians), and foreign nationals.

Part II--By Minorities provides the same detailed, school-specific data that is presented in the general *Part I* report for each of the six special population groups listed above: women, the four minority categories, and foreign nationals. For example, this volume allows a reader to identify specific schools in any particular geographic region that have awarded significant numbers of degrees in some particular field of engineering to women (or to black students, or to foreign nationals).

Part III--By Curriculum provides different tabulations of the degree data. Each major discipline is listed, with a line of data for each specific program offering. Often schools have more than one program in a single broad engineering or engineering technology discipline; when this is the case, institutions have multiple listings in the *Part III* report. Distinctions such as separate accredited and unaccredited offerings, or between programs leading to differing degrees (such as the difference between master of science and master of engineering diplomas) are preserved, and the specific titles attached to each degree are displayed. The latter step permits examination of

the data to find graduates with specialized engineering skills not otherwise identified in the more general tabulations of some 20 broad curriculum categories; for example, within the general group of industrial engineering graduates it is possible to locate specific programs in manufacturing engineering. For each program, both school-level descriptive codes and program-level ABET accreditation statuses are displayed. Numbers of degrees are listed separately for each major level (B.S., M.S., etc.), and overall totals are displayed along with aggregate totals for awards to women, minorities and foreigners. After presenting these data, with schools listed alphabetically within states for each of the major disciplinary categories in both engineering and engineering technology, a final tabulation summarizes national degree production for every program title used in the 1986 degree study.

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of degree level and school were checked against original questionnaires. Results across major disciplinary categories for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of degree production were checked and confirmed.

In addition, all institutional-level type and accreditation codes used by EMC were doublechecked, confirming all questionable assignments by using the 20th edition of *The College Blue Book* (New York: Macmillan, 1985). In some cases pending regional accreditation applicants (as listed in the *Blue Book*) were updated to reflect subsequent conferral of full accreditation, by direct checking with the institutions. Type codes were also revised in a number of cases, most frequently for institutions with a current and firm association with religious denominations (which had often been misidentified as secular private schools in earlier EMC reports). Again, direct queries with the schools were used to ensure that an appropriate characterization was used in ambiguous cases.

One type of error correction used in past EMC degree reports has *not* been used in the survey of 1986 degrees: the estimation of missing data. There are two reasons for this shift, each applicable to a particular type of missing data estimate used in the past. In earlier EMC educational surveys, we were usually unable to obtain data for every school of engineering we sought to include in the statistics, so estimates would be made to allow for missing institutions. In the 1986 survey, as in the previous 1985 survey, this problem did not arise (at least not after the use of EMC's traditional practice of allowing substitution of a prior-year response, if available, for any single instance of nonparticipation by a school; see below). The other type of estimation used in previous EMC reports was the development of conservative approximations for missing data on special population groups of interest to the engineering profession: data on degrees to women, minorities, or foreign nationals. In the 1986 degree survey, the incidence of this type of problem has been reduced to a minimum, and so we have elected to eliminate estimates altogether, so that tracking of degrees to these groups is not influenced by estimation errors. At the same time, a set of special response codes has been employed to flag all instances where schools did not provide these details. Accordingly, in reading the tabulations, if (for example) the number of degrees awarded to women is stated as zero and no special response code is present, the reader may assume that EMC judges the zero result to be real; if the number is zero but an "A" (for "All Details Missing") code is present, then the reader should assume that some degrees were probably awarded to women but that EMC does not know precisely how many such degrees there were. In addition to these flags, a table is provided below that lists all cases of missing data.

The effect of this change is to slightly lower our overall statistics on degree awards to women, minorities, and foreign nationals. Despite this, the 1986 totals show increases in awards to minorities at the bachelor's level compared to 1985, even though the 1985 figures did include missing data estimates. In the case of women, the absolute number of B.S. degrees drops slightly, compared to 1985; if missing data estimates had been used in both years we judge that the share of awards to women would have held roughly constant in 1985-86. More detailed comments on trends will be forthcoming in EMC's *Manpower Bulletin* No. 84 on "Engineering Degree Statistics and Trends, 1986"; we will note here, however, that the total number of B.S. degrees in 1986 was just slightly higher than in 1985, as expected.

In a few cases, schools were able to provide firm data on overall degrees to women, minorities, or foreign nationals, but were not able to provide specific assignments of these graduates to particular engineering programs; in those cases, EMC assigned the totals to the programs, using prior degree and enrollment reports and overall distribution of degrees among programs as a guide. These were *not* flagged as estimates, since the total figures used in the process were genuine. EMC has no objection to the use of reasoned estimates by schools themselves in reporting these data, and in the future we will strongly encourage schools to carry out this process for themselves rather than leaving it to EMC. Usually this step was used only when data was collected over the telephone for institutions that had not responded to the degree survey for two or more years.

As noted above, EMC is continuing its traditional practice of allowing the use of a prior year's response as a substitute for a single instance of nonparticipation. These substituted cases are now the only estimates left in the data base. These schools are listed below. They are also clearly flagged in the tables with "S" response codes. Substitutions were allowed for both engineering and engineering technology schools. The entire degree report was delayed somewhat in its processing while procuring and installing new computer systems, and to minimize further delays substitutions were used freely when available, reserving EMC's usual "arm twisting" to obtain missing data on those institutions which had not been heard from for two straight years, and for whom no substitution would be allowed. In future educational surveys, we will contact institutions to avoid substitutions as well--especially schools of special interest such as those that traditionally serve minorities or those that have any very substantial (more than 100) number of graduates.

Other quality control steps were taken. All ABET accreditation codes at the program level were double-checked for this year's degree study, resulting in the correction of some earlier errors (notably the erronious characterization of industrial engineering programs at both Oklahoma State University and the University of Oklahoma as not accredited by ABET; our apologies are in order). Also, a good deal of effort was expended to standardize the program titles listed in the *Part III* volume on details of curricula, eliminating distinctions produced by such nonsubstantive differences as variations in the style of abbreviations or in such choices as the designation of a program as "electronic engineering" versus "electronics engineering." At the same time, care was taken to preserve such distinctions as those between programs leading to the degree of, say, bachelor of chemical engineering, and other programs leading to the degree of bachelor of engineering with a reported chemical option or major field specialization. Such distinctions can reflect significant differences in philosophies of engineering education. (It should be noted, though, that such distinctions can also arise for reasons that have more to do with general institutional policies than with any particular approach to the education of engineers; furthermore, it is not clear that all of the schools that make these kinds of distinctions also report them to EMC.)

All this error checking for the survey of 1986 degrees has special significance for EMC, for this report is the initial application of the Commission's new computing systems, which are being used to create a permanent data base on engineering programs that will be used to support all our educational surveys. Despite all of the effort to eliminate mistakes, it is not likely that we will have succeeded in rooting out all of the problems in a single round of work. We will be continuing the work of developing and refining this data base and we urge all readers to contact us directly as any remaining errors are uncovered.

In the coming months, we will also be turning to a different aspect of these studies: the question of the best and most up-to-date taxonomy for the classification and labeling of engineering programs. We would like to hear from readers with suggestions about such matters, and we will be especially interested in identifying any students of engineering education who have experience with this subject.

Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies (see the inside back cover for addresses and telephone numbers). The three volumes of *Engineering and Technology Degrees: 1986* are available separately or as a set. For ordering information and prices, see the inside back cover.

SUBSTITUTED DATA

No 1986 degree report was obtained by EMC for the following schools. However, 1985 reports were available, and were substituted for the missing data. When these schools appear in tabulations, they are flagged with a special response code "S." In some cases substitutions were needed for only portions of a school's data (for example, information on B.S. awards in 1986 may have been submitted, but data on graduate degrees may have been left out, leading to substitution of the graduate degrees only). In such cases, the flags appear only when needed.

MISSING DATA

NOTE: this listing is *not* comparable to similar lists in previous EMC degree reports. Those listings identified schools which had not been included in the survey data at all. There are *no* such schools in the survey for 1986. The listing below is, instead, an inventory of institutions with missing *details* on one or more special population groups: women, minorities, or foreign nationals. As noted in the text, in 1986 EMC has *not* made any estimates to fill in these missing details:

Engineering Schools:

California Institute of Technology (no details)
California State--Fresno (no minority/foreign)
California State--Sacramento (no details)
Cornell University (no foreign at grad level)
Drexel Institute of Technology (no foreign)
Florida Atlantic University (no details)
Grove City College (no details)
Miami University (no minority/foreign)
New Jersey Inst. of Tech. (no minority/foreign)
New York Inst. of Tech. (no minority/foreign)
Oregon State University (no details)
South Dakota State University (no details)
St. Mary's University (no details)
SUNY--Binghampton Campus (no details)
University of California--Berkeley (no data on minorities/foreign for chemical engineering)
University of California--Davis (no details for graduate programs; undergraduate okay)
University of Dayton (no details)
University of Nevada--Reno (no details)
University of Nevada--School of Mines (no details)
University of New Haven (no details)
University of New Orleans (no details)
University of Tennessee--Knoxville (no foreign)
University of Washington (no foreign)
University of Wisconsin--Platteville (no details)
U.S. Military Academy (no details)
U.S. Navy Postgraduate School (no details)
Washington State University (no minority/foreign)

Engineering Technology Schools:

Central Maine Vocational Tech (no details)
City College of San Francisco (no details)
College of Staten Island (no minority/foreign)
DeVry Institutes: ALL LOCATIONS (no details)
Erie Community College (no details)
Houston Community College (no details)
Montgomery College (no details)
SUNY College of Technology (no minority/foreign)
Technical Career Institute (no details)
Tri-City State Tech (no details)
University of Dayton (no details)
University of Hartford (no details)
University of Houston--Downtown (no details)

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

In place of a numerical coding scheme previously used by EMC, the 1986 survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School: "S" means state or other public control, including municipally-sponsored schools, excluding federally-sponsored service academies (which are designated with an "F"). "N" means non-sectarian, non-profit private institutions. "R" denotes religiously affiliated private institutions. "P" denotes proprietary schools.

A: Accreditation: "E" means at least one *engineering* program is accredited by ABET. "T" means that at least one *technology* program is accredited by ABET. "B" means that the school has ABET-approved courses in *both* engineering and technology. "R" means the school does not have ABET-accredited courses but is approved at the institutional level by a recognized regional accreditation agency, such as the Southern Association of Colleges and Schools. "X" means none of the preceeding codes apply (in most cases, schools with this code are approved candidates for regional certification). An "N" code (accreditation by NATTS, the National Association of Trade and Technical Schools) was allowed but not used.

R: Response: These codes appear only when applicable. "S" denotes substituted data; in a few cases such schools also have missing details (see the listings above to identify these). "X" is a special code standing for "extra data" and used only in the case of the University of Texas at Austin (see "Miscellaneous Notes," below). All other special response codes denote one or another type of missing data for details on special population groups. "A" means that all such data were missing. "Y" denotes cases where all details were missing *except* data on women. "F" means that data on foreign nationals was missing. "Z" is a special code used only for the University of California at Berkeley, which supplies all details except data on degrees in chemical engineering to minorities and foreign nationals. Other special codes--for example, an "M" code for missing data on minorities only--were allowed but not used. Note that the response codes are program-specific: they may appear in one listing for a school but not appear in another, if one program involved substitutions or missing details but the other did not.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RRS: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1985 response. "TAR" code of NEY: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the *Part III* volume on curriculum details: "B" denotes ABET accreditation for the program at the bachelor's level; "M" denotes ABET accreditation at the master's level (now only rarely used for programs with no B.S. equivalent); "A" denotes ABET accreditation at the associate degree level; "N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when a ABET-approved BS curriculum in mechanical engineering was present. If an undergraduate program in engineering mechanics as such existed, then the "B" code was used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation.

DISCIPLINE CATEGORY ABBREVIATIONS:

Engineering Degrees:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others

Engineering Technology Degrees:

AER = Aeronautical
ACN = Air Conditioning/Heating/Refrigeration
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil/Highway/Surveying
CMP = Computer
CON = Construction
DRF = Drafting/Design
ELC = Electrical
ELM = Electromechanical
ELX = Electronic
ENS = Engineering Science
GNL = General Engineering
INM = Industrial/Manufacturing
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgical/Welding
NUC = Nuclear
OTH = Other (including Agric/Bio/Envir/Petrol)
PRE = Pre-Engineering

MISCELLANEOUS NOTES

All "3-2" programs or other pre-engineering curricula are treated as technology courses.

The following institutional name changes are reflected in the 1986 survey: University of Santa Clara to Santa Clara University; Southern Technical Institute to Southern College of Technology; Northeastern Oklahoma State University to Northeastern State University.

The new engineering program at Alfred University is listed separately from the degrees of the SUNY College of Ceramics at Alfred University. Other newly listed engineering schools include the University of Southern Colorado, FAMU/FSU, Loras College, St. Ambrose College, St. Cloud State University, the University of Texas at San Antonio, George Mason University, and Cogswell College North.

Because EMC is now allowing somewhat later responses than in earlier years, the University of Texas at Austin shifted to a September-through-September reporting schedule. To report total degree production, the school supplied data for an extra fifth quarter, which was included. This case is flagged with the special response code "X" (for extra data).

In EMC's 1985 degree report, undergraduate and graduate listings for the University of Alaska at Anchorage were reversed. Also, Auburn University was erroniously listed as missing from the data for ABET-accredited technology programs, but in fact these degrees had been erroniously listed as engineering B.S. awards. In addition, there were the two errors in identification of the ABET accreditation statuses of industrial engineering programs at Oklahoma State University and the University of Oklahoma, as noted in the text, above; both programs are in fact approved by ABET.

RECENT ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1986

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $135.00 non-member price: $225.00

PROFESSIONAL INCOME OF ENGINEERS 1986

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $45.00 non-member price: $75.00

SALARIES OF ENGINEERS IN EDUCATION 1986

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $50.00 non-member price: $80.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1985

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $105.00 non-member price $175.00

Separate volumes:

Part I: Engineering Enrollments: member price: $60.00 non-member price: $100.00

Part II: Technology Enrollments: member price: $60.00 non-member price: $100.00

ENGINEERING AND TECHNOLOGY DEGREES, 1986

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $120 non-member price: $200.00

Separate volumes:

Part I: by School: member price: $45.00 non-member price: $75.00

Part II: Minorities: member price: $60.00 non-member price: $100.00

Part III: by Curriculum: member price: $45.00 non-member price: $75.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year (minimum five issues, July through June) member price: $45.00 non-member price: $75.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Add $1.00 per book for book rate postage; add 5% of total amount for first class postage. Foreign orders add 10%. No handling charges for *Bulletin* orders. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.
